DETAILED ACTION

- Applicant's response filed on 09/07/2007 has been fully considered. The
 USC 112 and 35 UCS 103 rejections have been withdrawn in view of applicant's comments.
- 2. Claims 11-20 are canceled, and claims 1-10 are pending.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sismondi et al. (US 6,387,473 B1) in view of Miller (US 2002/0142141 A1).
- 5. Sismondi discloses an ink jet receiving sheet comprising a support and ink receiving layers on the support (abstract). The support is described on col. 4, line 30. The ink receiving layers comprise a non-ionic surfactant (col. 3, line 31 thru col. 4, line 29), a binder (col. 5, line 63 thru col. 6, line 48), inorganic particles (col. 7, line 11 thru col. 24), an additional surfactant (col. 7, line 43 thru col. 61), a mordant (col. 7, line 62 thru col. 8, line 61), and a hardener (col. 8, line 63 thru col. 9, line 17). The ink receiving layers furthers comprise glossiness improving agents, matting agents, a plasticizer, biocides and conventional

additives; however, these additional components are added to improve the pictorial or physical properties of the image.

- 6. Sismondi does not disclose the use of silicone surfactant as the non-ionic surfactant. However, Miller teaches an image receptor sheet comprising an image receiving layer provided on a substrate, wherein the image receiving layer comprises a non-ionic silicone surfactant such as SILWET L-7605 [0049]. Sismondi and Miller are analogous art because they are from the same field of endeavor that is the ink jet recording sheet art. At the time of the invention it would have been obvious to a person of ordinary skill in the art to combine the silicone surfactant of Miller with the invention Sismondi, and the motivation would be, as Miller suggests, improving handling and sheet feeding characteristics [0049].
- 7. The surfactant of Miller, among other components, is mixed with at least one organic polymer, and then the mixture is coated followed by drying to form the layer (Examples). Upon drying there must be some type of bonding among the components, other wise the coated layer would fall off.

Response to Arguments

8. Applicant's arguments with respect to claims 1-10 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number:

10/613,497 Art Unit: 1794

Conclusion

- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Betelhem Shewareged whose telephone number is 571-272-1529. The examiner can normally be reached on Mon.-Fri. 8:00AM-4:30PM.
- 10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 11. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
